

ECON 3640 - Assignment 4

DEADLINE: 06.23.2021

Find “**Edwin T. Jaynes - Probability Theory The Logic of Science - Chapter 9-10**” in “**Files**” folder. You don’t have to figure out the technical aspects of the chapter. Starting from “**Probability and Frequency**” (page 16/44) Jaynes is pointing out probabilities and frequencies are different things and continues with giving an example in “**Halley’s Mortality Table**”. Write no more than a page to summarize how probabilities differ from frequencies.
